Subject: Yucca Mountain recommendation:

Part of Records Package / Supplement / Correction

October 12th, 2001

Ms. Carol Hanlon
S&ER Products Manager
U. S. Department of Energy
Yucca Mountain Site Characterization Office
P.O. Box 30307 M/S 025
North Las Vegas, NV 89036-0707

Dear Ms. Hanlon:

I am writing to ask that the Department of Energy recommend to President George Bush that the site at Yucca Mountain, Nevada be designated the national repository for high-level radioactive waste and spent fuel.

I have only been working in Nuclear Energy for about 2 years now and I have read a lot of research from many different locations about the Yucca Mountain Site. I believe it is the appropriate location and should be used to store the nation's spent fuel.

I have seen reports that correlate the amount of radioactivity proposed at the site in comparison with the amount received to the employees that work at the Capitol Building. These reports support that the amount of radiation is acceptable, just like it is by the Capitol Building and the dosage recommendations by the EPA. I believe there would be no significant risk to the surrounding environment and communities.

Based on these reasons, I urge the Department to recommend the Yucca Mountain site to the President

Sincerely,

Robert J. Rowcotsky
